

**MRM UI testing**

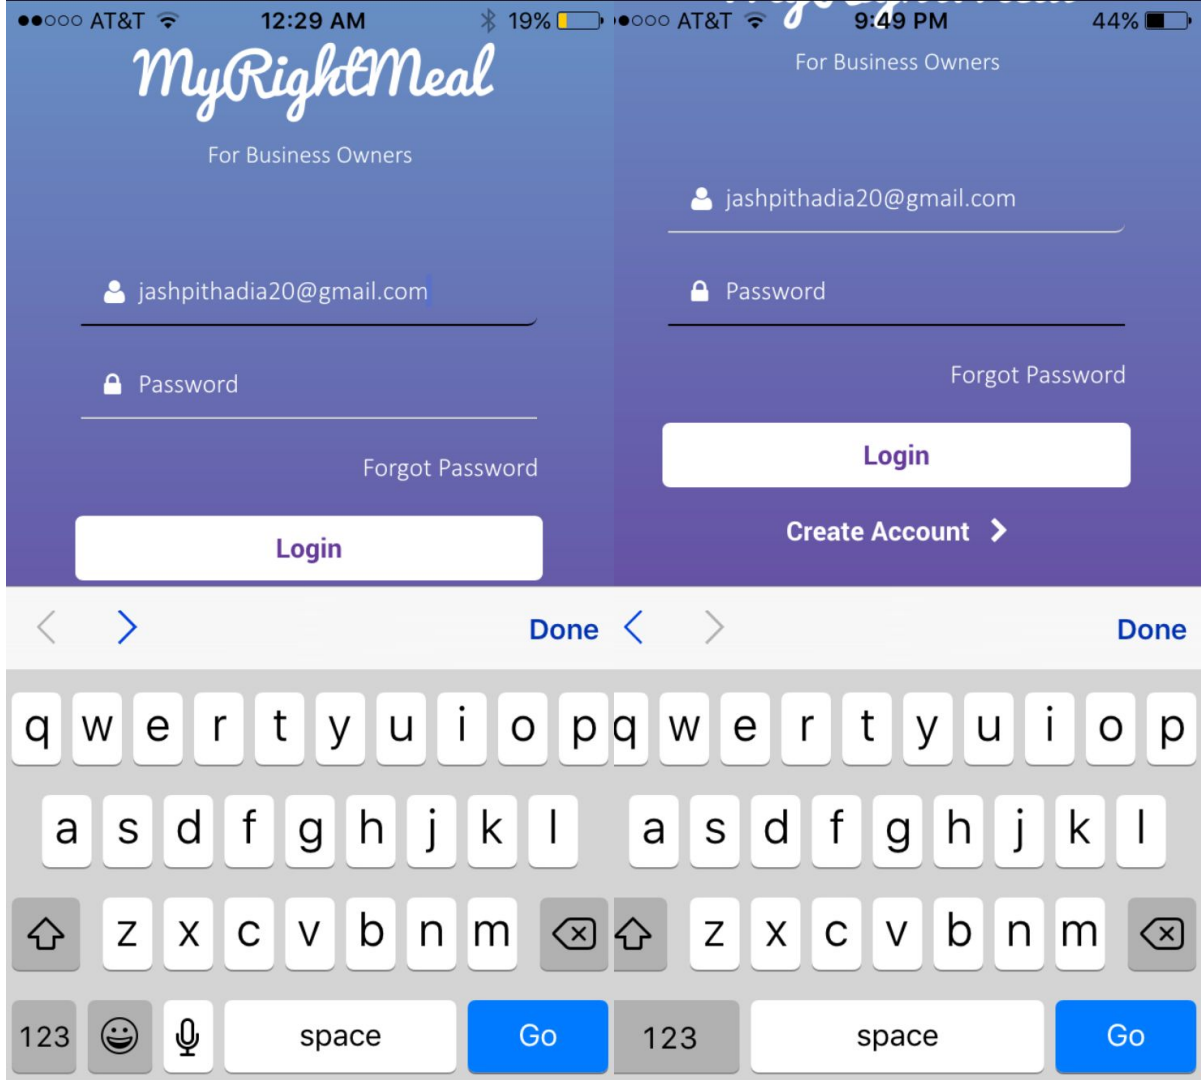

# Landscape View

We should have a single **Potrait view** of app instead of allowing user to use Landscape view also

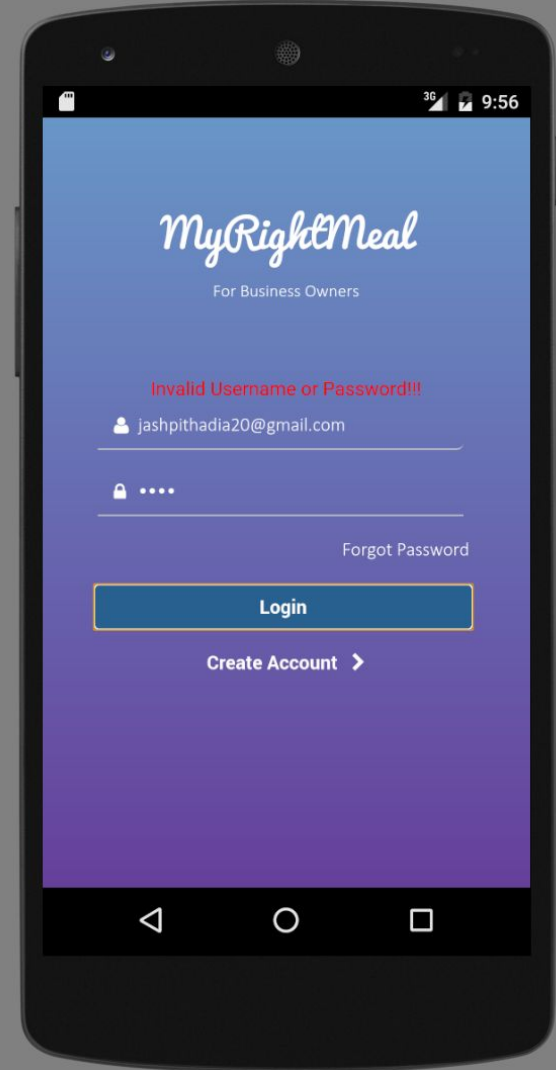

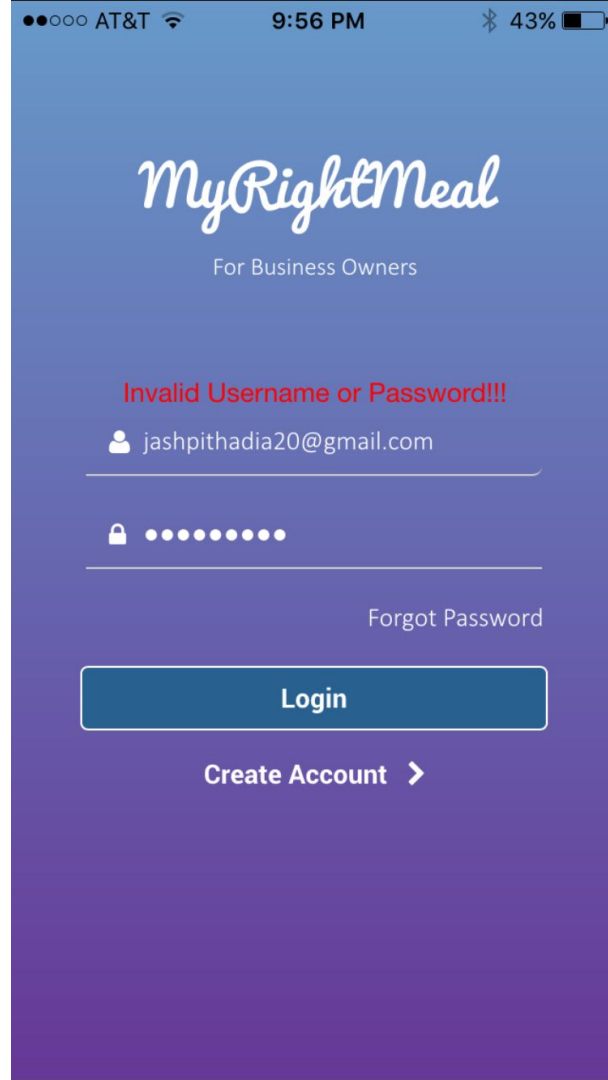

MRM text slides up which leads to inconsistent UI

The view should be consistent While entering the password.

Color red has a high contrast which makes it difficult to read the text

We can follow a generic format for input

The tab view is not visible in Android

Action bar - The text in action bar “Menu” has a scroll view movement which should be fixed

1.The text data on the screen should Not be selected by the user

2.MRM is a hybrid mobile app and on long click the we can see the “Open”,“copy”,,”cancel” options which should be avoided

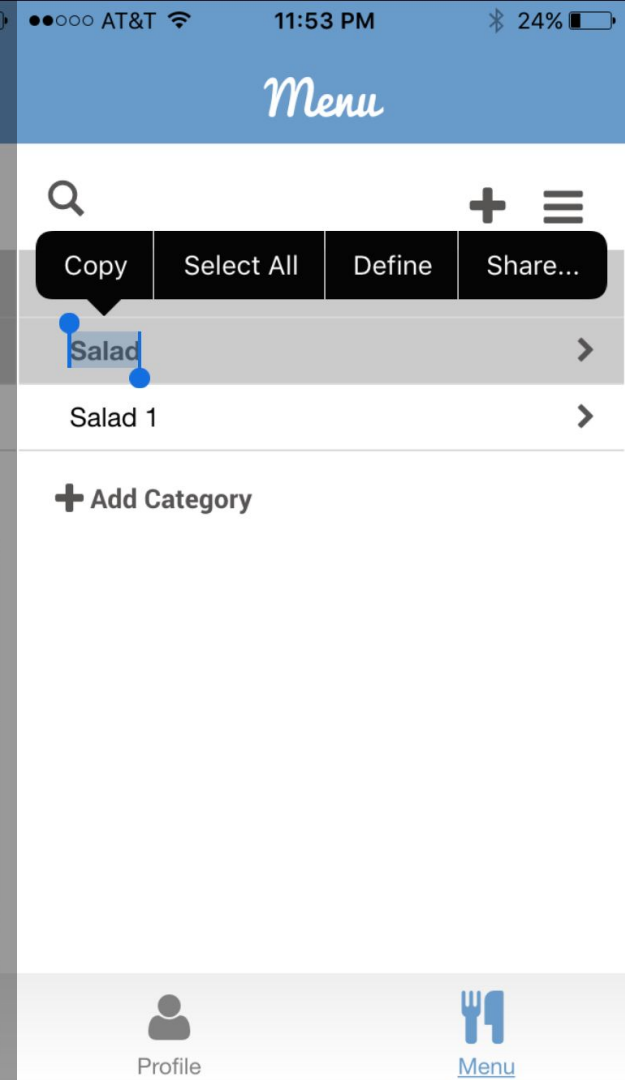

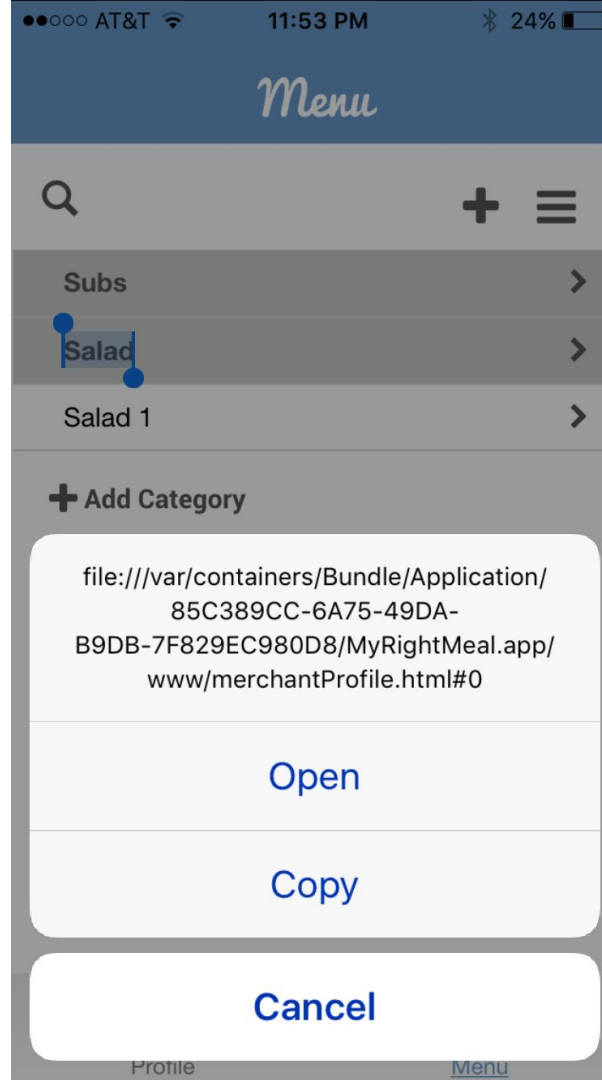

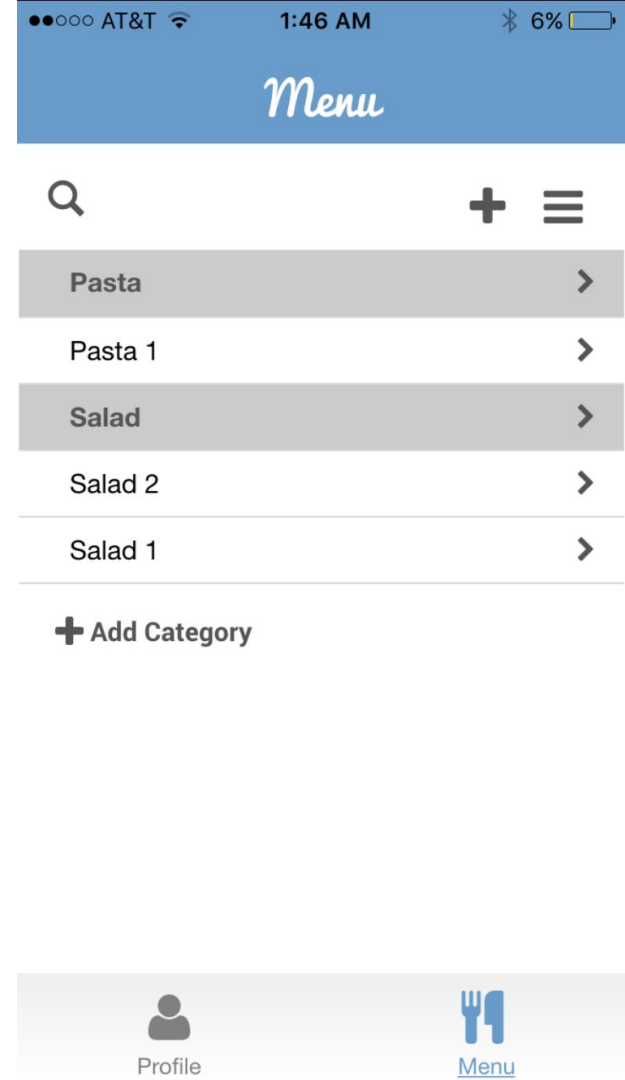

Fig 1

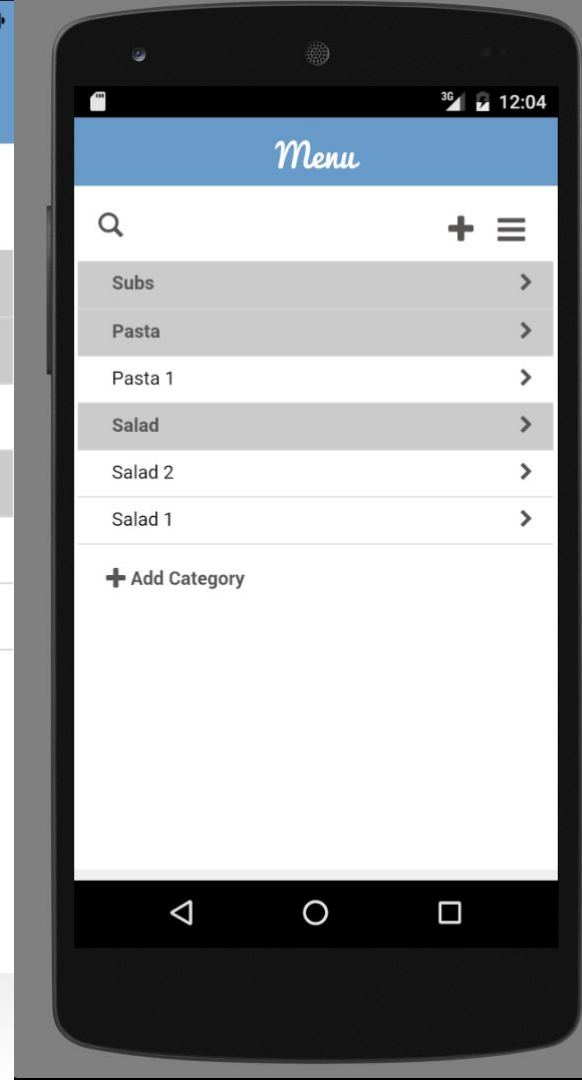

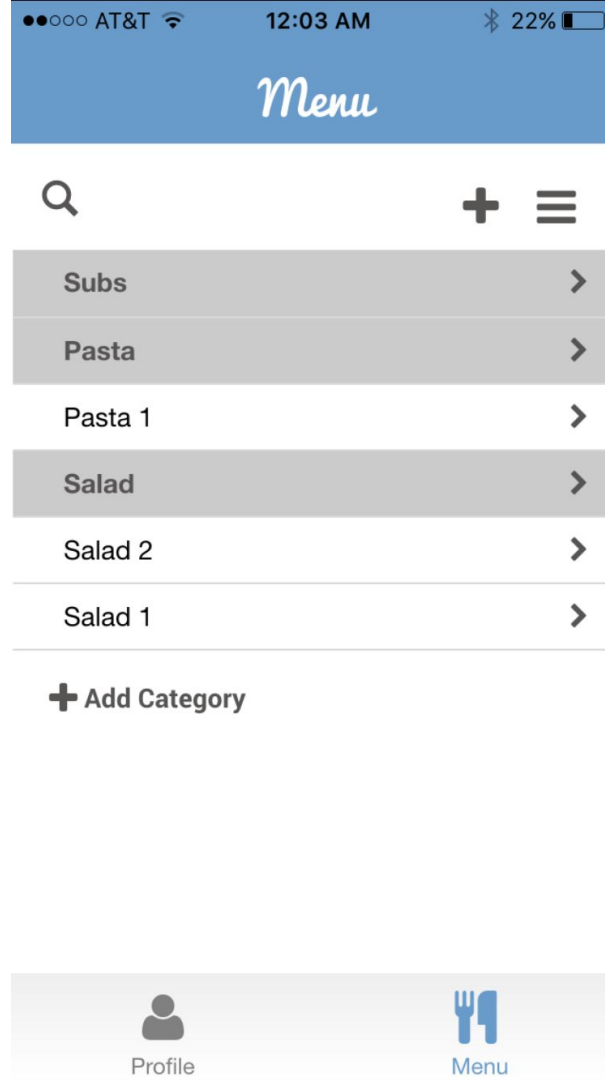

Fig 2

We can replace the edit logo from Fig 1 to Fig 2

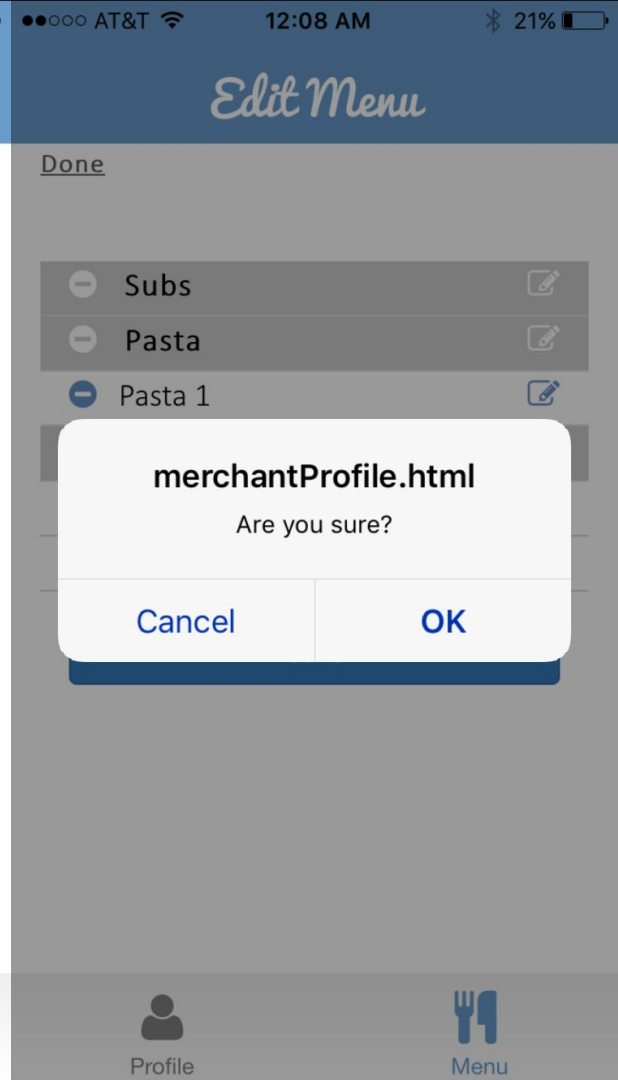

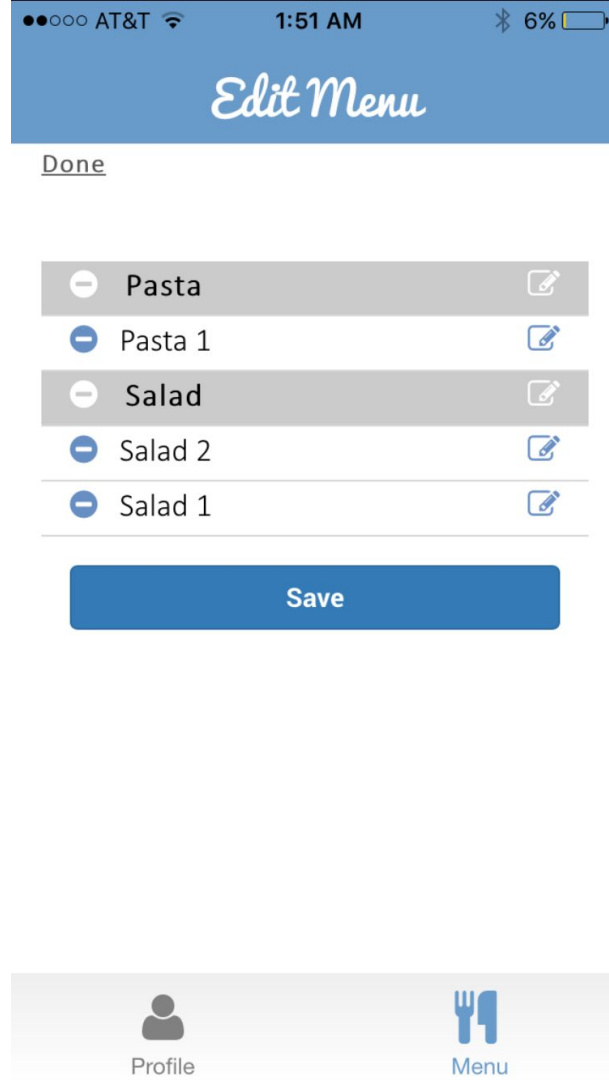

1. User cannot see the details of Individual item  
for example: pasta 1

2. User can be confused between  
add category and add item option

1. Search bar can be implemented in Edit Menu activity

2. Informative feedback while deleting an item

- 1.The app does not resume back and user has to enter the credentials again.
- 2.We can have a Splash Screen activity after the login is decided.

End
